# SOLARES PARASOL

REVOLUTIONIZE THE IDEA  
OF TERRACES

Solares is the new sun protection system designed to provide a high dose of elegance and style when dealing with the sun.

This new parasol is easy for professionals to install and convenient for users to use.

It offers efficient protection against solar radiation, both in residential spaces and in those destined for the hotel and catering trade, thanks to the wide projection of shade offered by its different configurations.

## ONE PROTECTION SYSTEM, MULTIPLE POSSIBILITIES

This large parasol has a telescopic mechanism that allows easy closing by rotating a spindle using a removable crank handle.

Thanks to the possibility of configuring 3 different shaping arrangements, it will adapt perfectly to any type of need both in the housing sector and in businesses.

## TOTAL PROTECTION AGAINST SOLAR INCIDENCE

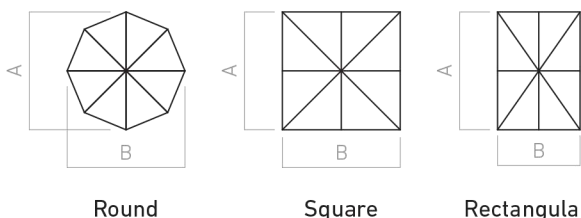

The properties of the fabric allow **total control** over **solar radiation**.

By fixing the fabric to the profiles and, depending on the fabric, waterproofing can be guaranteed even on the rainiest days.

## SHAPES

Possibility of opting for different structure configurations to cover the necessary space with the fabric.

Round

Square

Rectangular

## GREAT ADVANTAGES FOR THE INSTALLER

Easy to assemble and quick maintenance inspection. The cover of this parasol is made up of **8 individually interchangeable pieces of fabric**, which makes maintenance and repair so much easier. **The pieces do not have joins.**

## OPTIMAL ANGLE

All configurations are manufactured with a **17° angle** in order to help the drainage of water.

## PERFECT LIGHTING

This new solar protection system allows the installation of a **portable LED lighting kit**.

## THE BEST MATERIALS GUARANTEED

Components made from **aluminium**, metal fittings made from galvanized steel and stainless steel screws that guarantee great strength.

# SYSTEM FEATURES

## TECHNICAL AND AESTHETIC PERFORMANCE

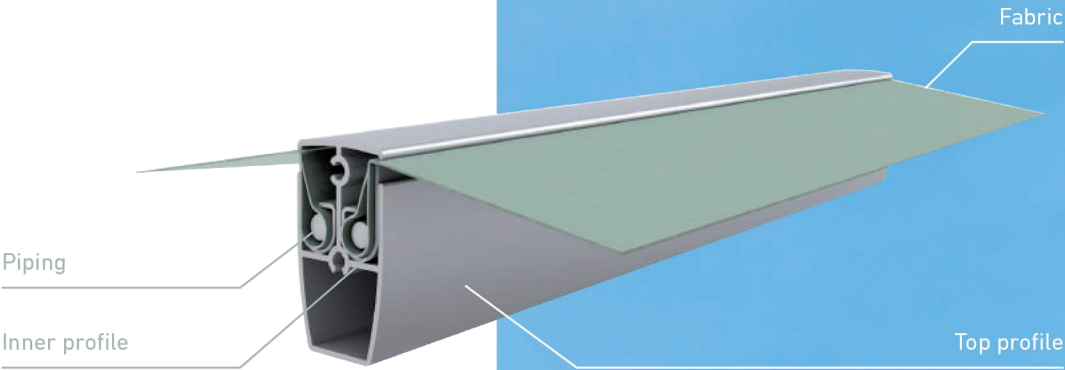

The joins between the profiles, done by means of cotter pin, clip and bushing assemblies, avoid friction and favour the modern aesthetics of the system.

The fabric is attached to the inner profile and welded, which ensures durability and prevents water entry.

## MAXIMUM DURABILITY

The rods of the parasol have a wide section that ensures its stability in any condition.

Thanks to the configuration of the fabric in independent pieces, its simple to change without requiring any effort on the part of the installer.

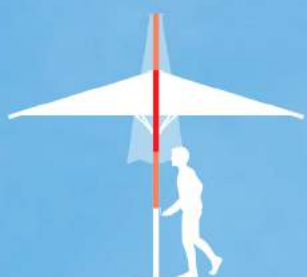

Telescopic pole

Worm drive

Mechanism

Crank handle

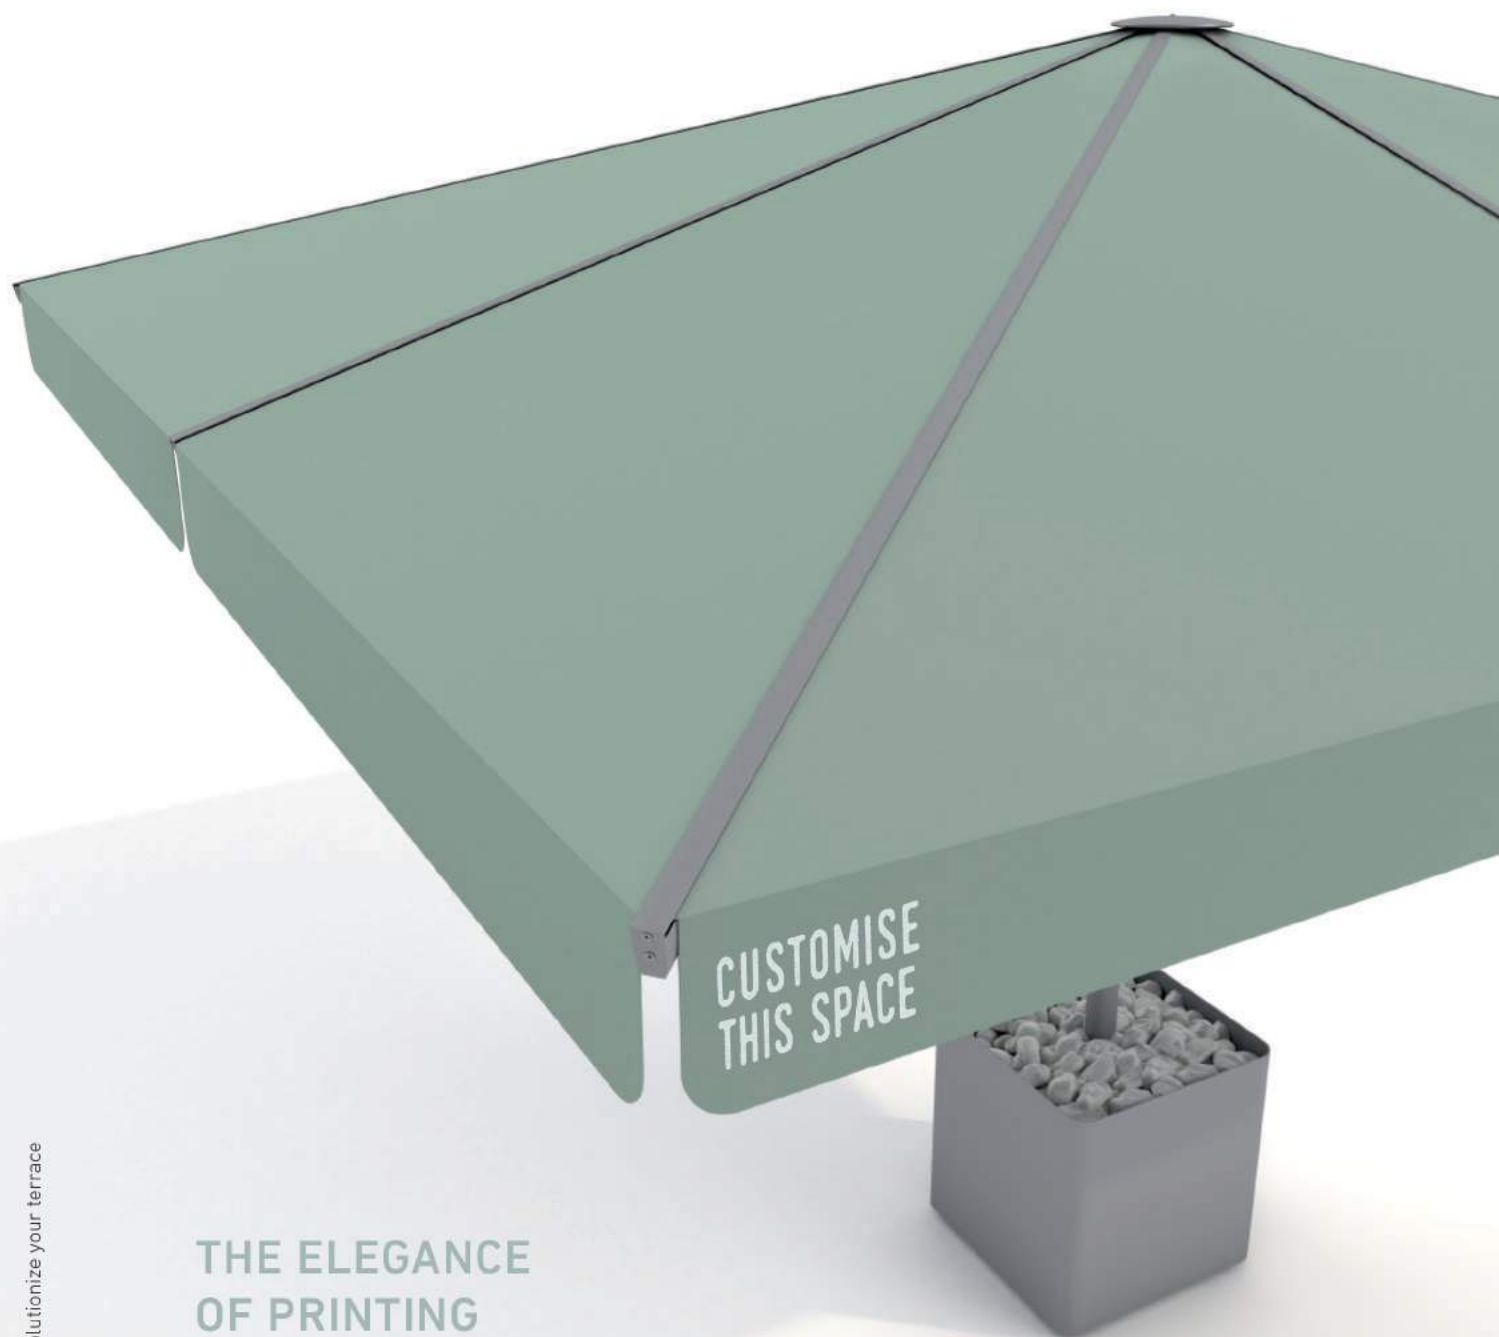

## EASE OF USE

The operation of this system is based on a telescopic system integrated into the pole.

Using one crank handle drive the mechanism is activated and makes the telescopic system slide through the spindle, without the user having to worry about removing nearby objects beforehand.

A system that guarantees durability and safety.

## OPTIONAL UPGRADES

### THE ELEGANCE OF PRINTING

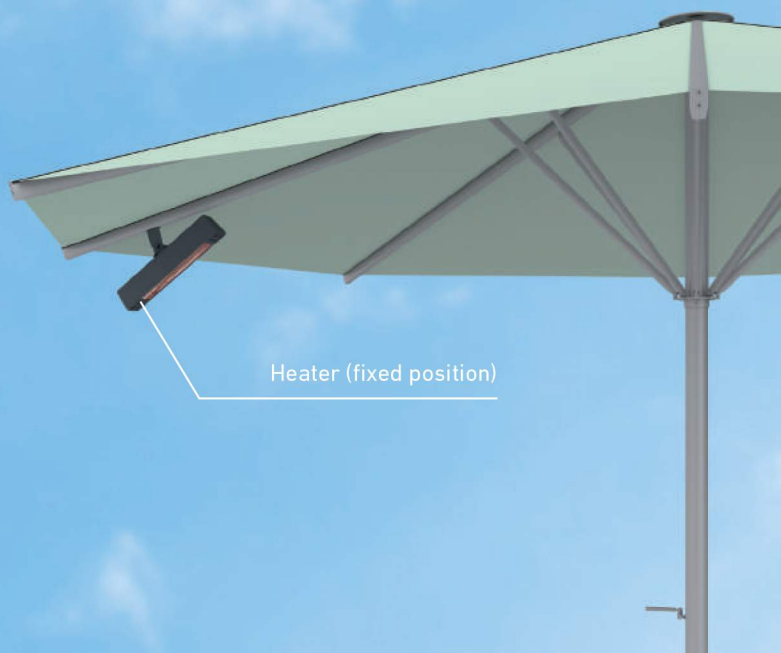

Those who choose the installation of an apron as a complement to the parasol, will get greater protection from the horizontal sun rays as the sun sets.

An option that enhances aesthetics and allows personalized signage with the logo of businesses or institutions.

## WARM SPACES EVEN IN THE COLDEST MONTHS

In order to guarantee the optimum temperature in the coldest months, Besta allows the use of a heating system that will guarantee the well-being of those on the terrace.

This system, according to the needs of the user, can be installed in fixed or mobile position.

Heater (fixed position)

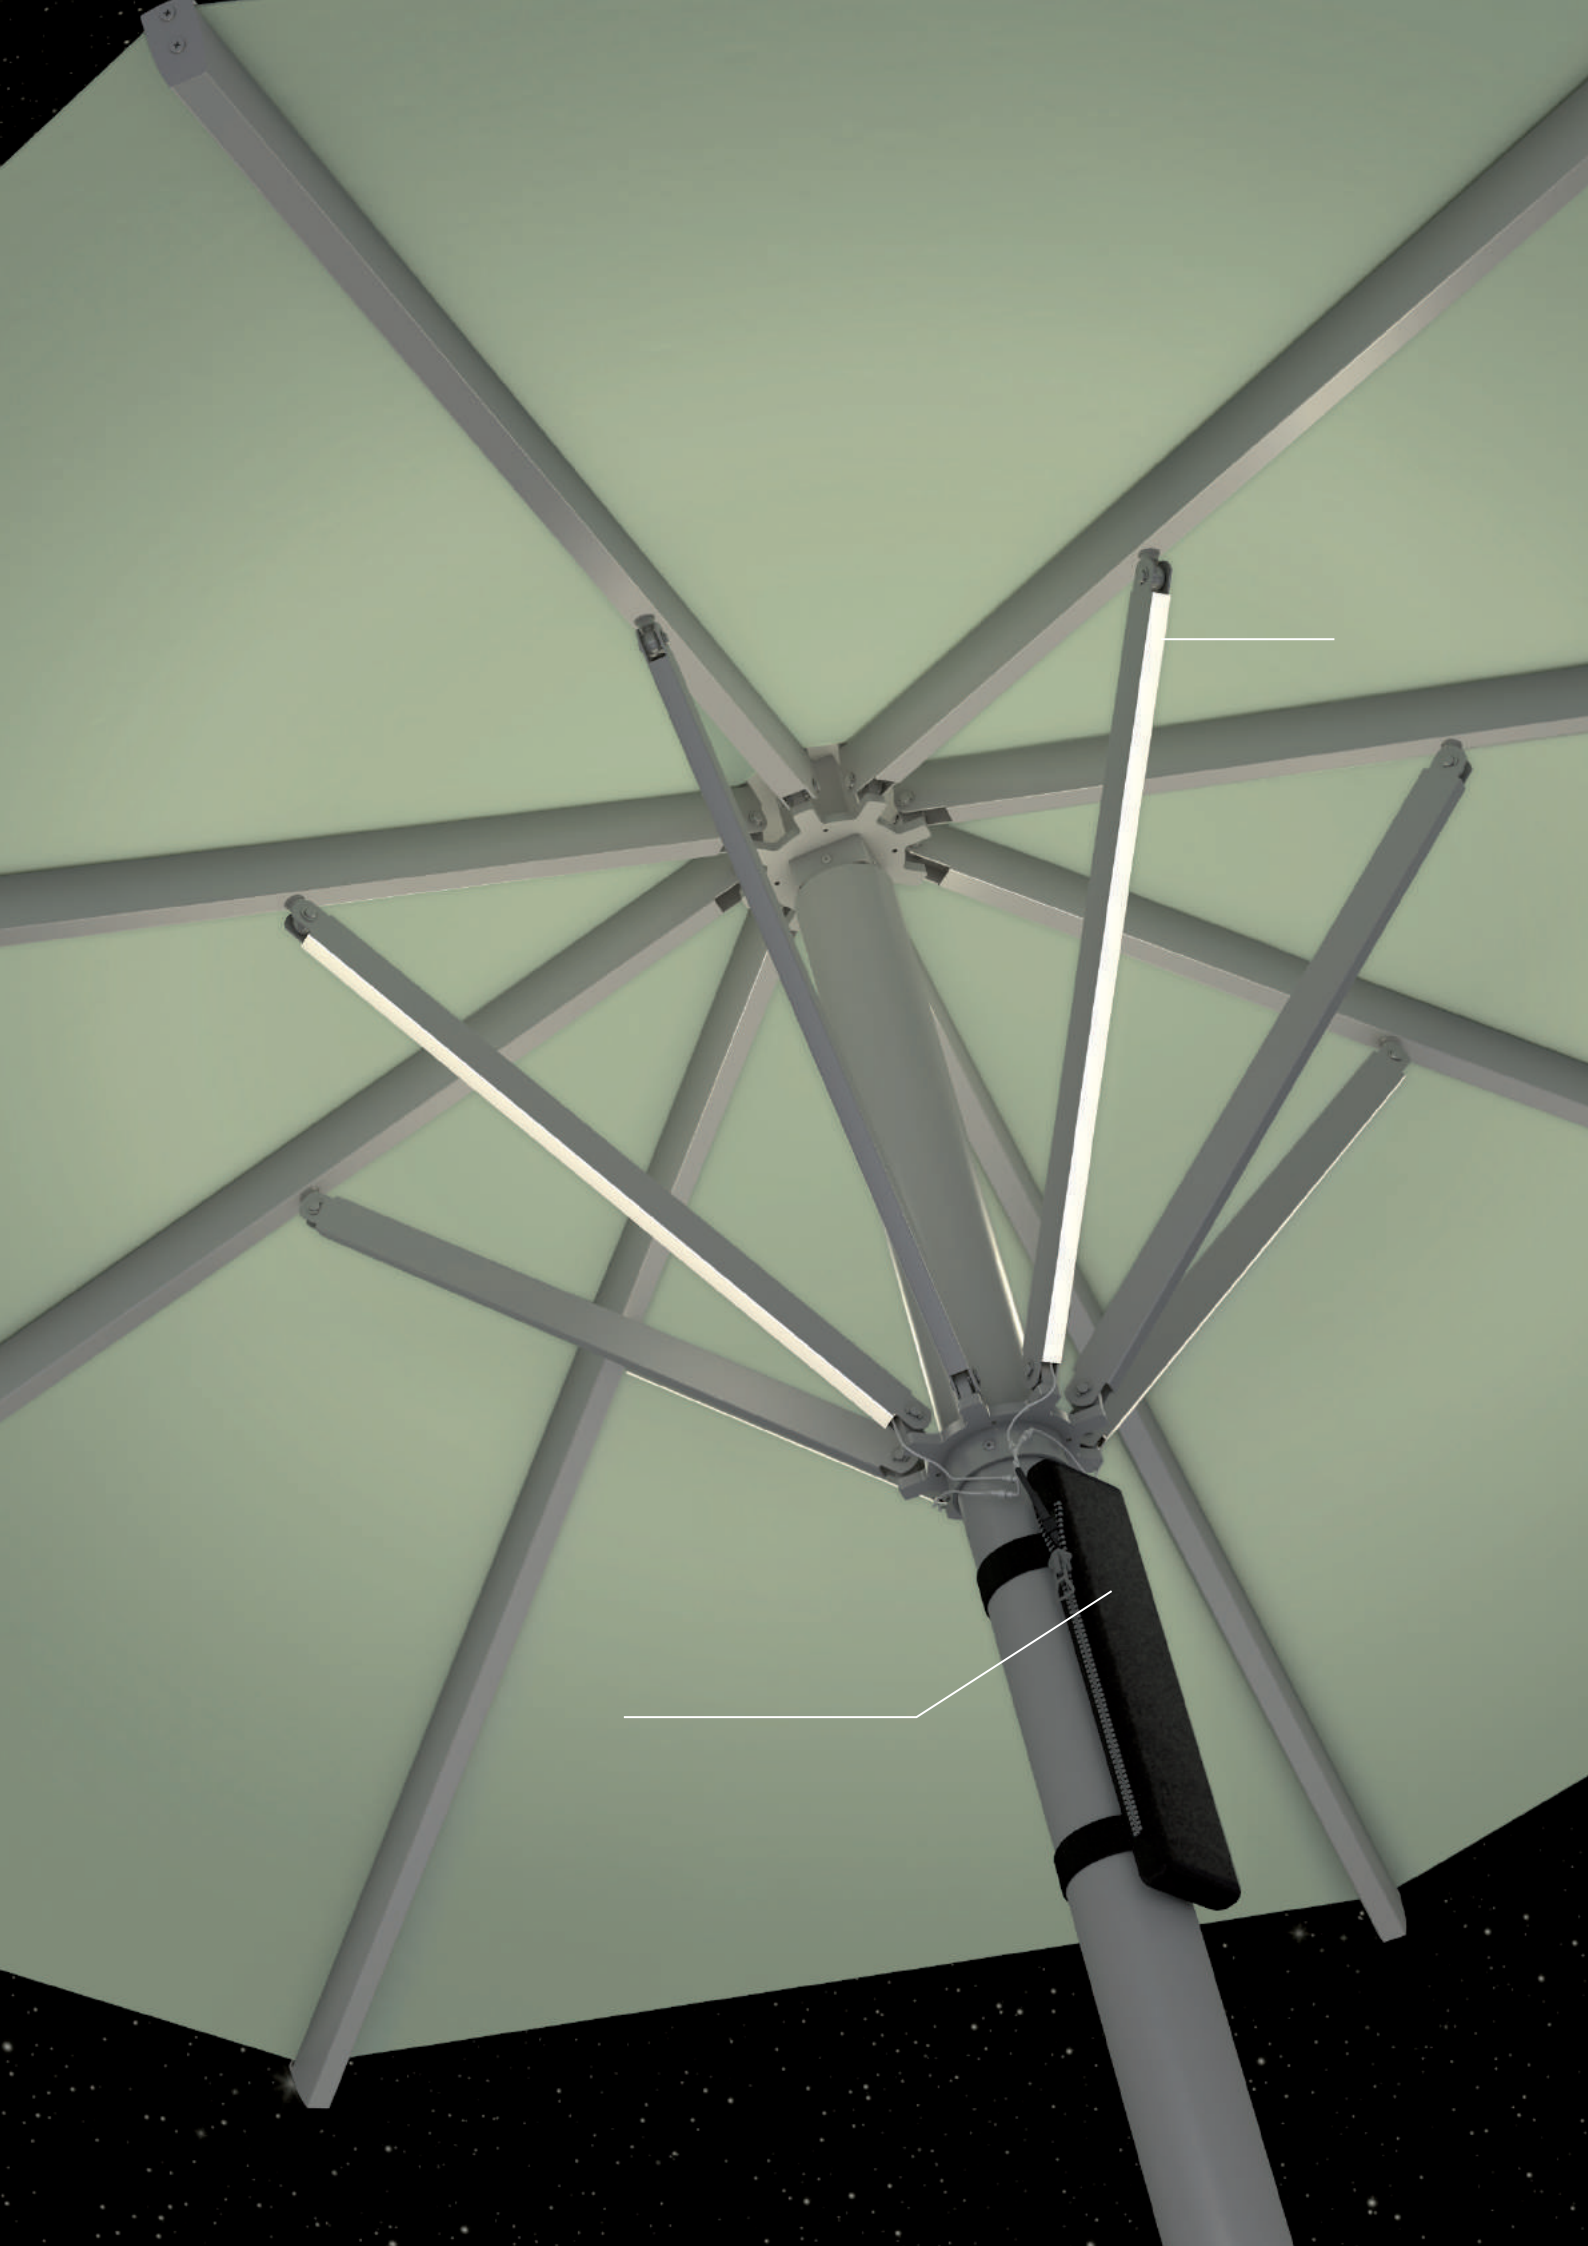

Heater (mobile position)

## ILLUMINATING THE MOST SPECIAL MOMENTS

The possibility of incorporating 4 strips of 12V LED light in the arms of the system, allows the users to enjoy the product at night time, illuminating the space and endowing it with a unique personality.

Rechargeable battery power helps give the product autonomy that makes it easy to install anywhere.

## FABRICS

### MAXIMUM CUSTOMIZATION

Besta allows the client to create their attractive combinations to obtain a totally personalized design.

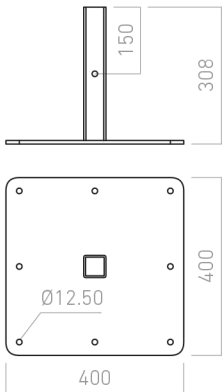

With respect to the fabric, it allows the choice between a wide range of colours from our selection of acrylic fabrics, as well as flame-retardant PVC fabrics. Colours from the Precontraint 622 collection are also available. A chromatic range that you will be able to discover in our "Sample book Saffar".

All these colourings can be combined with any of the RAL chart colours that we make available to users for the structure of the parasol, allowing textured and anodised finishes.

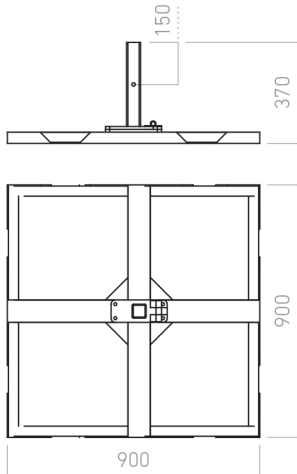

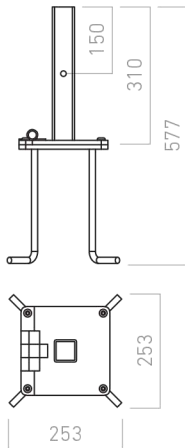

# FASTENING TYPES

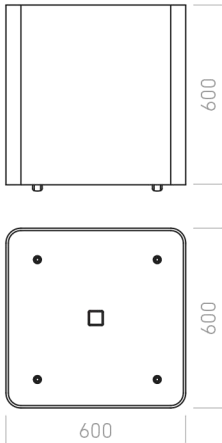

Fixed base 400x400

Mobile base  
with wheels  
024549

Hidden  
recessed base  
024547

## RECESSED BASE

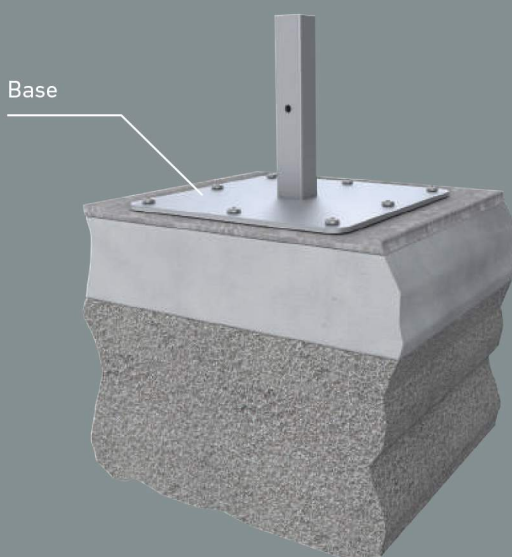

The steel anchor tube is a perfect fit for flush installation on concrete floors.

Easy to assemble and disassemble, it allows quick installation of the parasol.

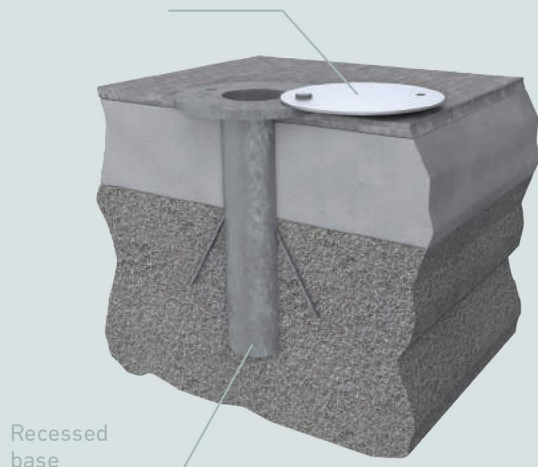

## FIXED BASE 400x400

Bolted system made of steel, is ideal for installation in spaces that do not allow deep drilling.

The use of bolts allows easy disassembly and simple reinstallation elsewhere, favouring mobility on terraces that are not used all year round.

Cover

## HIDDEN RECESSED BASE

Made of steel that is ideal to ensure maximum support in spaces where the structure should not protrude.

# AN ALLIED SYSTEM OF HOTELIERS

Thanks to the modulation and customisation possibilities that the system allows the business owner will be able to see the aesthetic needs of their business satisfied.

# CREATING EXCLUSIVE SPACES

The ability to cast large shadows, as well as the high quality of fabrics, make Besta a high performance solution for terraces where users expect to spend a lot of time.

A solution suitable with the best restaurants.  
A protection system designed for ten star spaces.
